OBJECTIVE

Motivated Full-Stack Developer seeking to bring a fresh, analytical perspective to innovative MERN stack software projects. A rapid learner who excels at asking critical questions to uncover core requirements, dedicated to building scalable and responsive web applications using modern JavaScript frameworks.

EDUCATION

Bachelor of Business and Information Technology, Punjab University (Lahore) CGPA: 3.79/4.0
(Expected Graduation: May 2027)

Intermediate, Punjab Group of Colleges 95%

SKILLS

Technical Skills C++, OOP, SQL (Oracle), REST API, Python basics, Node.js, Express.js, WordPress, PHP, HTML5, CSS3, JavaScript, React, Bootstrap, Tailwind CSS, Figma, Linux (Bash), Network Security, Git/GitHub

Certifications Google Cybersecurity Professional: (Foundations, Risk Management, Networks, Linux & SQL)

EXPERIENCE

IT Intern — IREG - IT Dec 2024 — Jun 2025

- Led requirement gathering sessions and authored comprehensive technical documentation to clearly define project scope.
- Conducted black-box testing on pre-deployment software, identifying bugs to ensure a seamless end-user experience.
- Contributed to front-end development by building and refining responsive user interface components.

PROJECTS

HostelHub — *Node.js, Express.js, MongoDB Atlas, JWT, JS*

- Developed a secure, multi-tenant hostel management SPA using Node.js and MongoDB to automate resident lifecycle workflows, monthly dues tracking, and real-time occupancy analytics.

LogicBot (Logic Prover) — *Algorithms, Discrete Math*

- Engineered a logic prover that verifies validity by applying rules of inference and replacement.
- Designed complex algorithms to handle premise-conclusion inputs and logical transformations.

AI ChatBot — *React, CSS3*

- Built a responsive chatbot application with an interactive UI featuring light and dark mode.
- Developed asynchronous query handling to provide real-time responses to user inputs.

Student Database Management — *Oracle, MS Access, SQL*

- Designed a relational database to store and query student records efficiently using Oracle.
- Implemented SQL queries for data retrieval, ensuring data integrity and optimized performance.

Currency Converter — *HTML5, CSS3, JS, ExchangeRate API*

- Developed a responsive tool for real-time currency conversion with a clean, mobile-first interface.
